

# Recycling Made Easy

## Divert Discarded Items from Landfills

Through the TerraCycle Zero Waste Box™ system, you can recycle almost any type of waste, from your coffee capsules to complex laboratory waste. TerraCycle has helped divert millions of pounds of discarded items from landfills all over the world.

### Recycle Select Waste Streams Through A Simple Process

Choose the waste stream you'd like to recycle, purchase your preferred box size, collect your waste, and return the sealed box to TerraCycle to be repurposed. Each Zero Waste Box system includes a labeled cardboard box, a built-in liner, and a pre-attached return shipping label. The price of each box includes shipping fees (to and from your location) and the cost of recycling the discarded materials.
